- 03.03.2015 Tuesday (15.15h - 16.55h)
- 04.03.2015 Wednesday (9.00h - 11.05h)

Description

Castres-Mazamet Technopole CEEI is a French innovation support organization, located in South West France (close to Toulouse). Castres-Mazamet Technopole deploys its innovation development expertise and supports innovation in the digital fields and in health sector, with a strong specialisation in e-health. The organization supports companies, universities, searchers and local organisations in their innovation projects, notably by leading and forming a network between technological, scientific and economical expertise, in France and Europe. Castres-Mazamet Technopole is part of different consortia for ehealth projects and supports companies and universities in their searches for partners, funds and new projects (calls and existing consortia), within Europe. Castres-Mazamet Technopole promotes the South West region of France and attracts new companies. Castres-Mazamet Technopole also assists businesses in incubation to get started and develop in the region. The Technopole also organises each year at the beginning of July a main international ehealth event : the ehealth Summer University, that will take place in 1-3 July 2015 in Castres.

Request

Request ehealth (digital in health) expertise for eHealth Summer University 2015 and eHealth Awards

Castres-Mazamet Technopole (CMT) has a strong specialisation in e-health and organises since 9 years the eHealth Summer University.

This is an international event that will take place on 1-3 July 2015 in Castres (1h far from Toulouse, South West France). For this event, Castres-Mazamet Technopole is looking for foreign companies and research centers having ehealth solutions and/or projects:

1/ To apply to the eHealth Awards that are open to all, businesses, researchers, students, at the national and international level, who have developed a solution or an innovative application in the field of eHealth, the eHealth Awards not only a living observatory of digital healthcare innovation but also a veritable seal of approval allowing to identify the champions of tomorrow.

Sponsored among others by the Pierre Fabre Laboratories, Alere, Thales and Consort NT, the eHealth Awards provide project leaders an opportunity to boost their innovation, to build business partnerships and promote their solution to a wide audience.

5 categories will be rewarded during the Awards Ceremony which is open to the public and will be held on the 2nd of July 2015 during the eHealth Summer University:

1. Telemedicine (Teleconsultation, teleexpertise, telesurveillance and teleassistance)
2. Autonomy and homecare (Home automation, geolocation, fall detectors...)
3. mHealth (Mobile applications, mobile telemedicine □)
4. Social networks (Internet portals/spaces dedicated to the collection of information, discussions and sharing of knowledge between patients/families/caregivers/healthcare providers and professionals □)
5. Student projects (Projects conducted by students in the field of eHealth)

Real springboard for innovations in the field of health technologies, the e-Health Awards provide project leaders a visibility into the Press and among the main actors, policy makers and funders of the sector, and a recognition among health professionals. For this 2015 edition, the finalists will be invited to come and present their project on the 1st of July 2015, to a Jury in a public session which will be broadcast live on the eHealth web TV.

Beyond the financial reward of up to 4000 € and recognition by a Jury of experts, the eHealth Awards also act as a lever and accelerator for the winning projects by giving them a unique showcase.

Candidates have until May 19, 2015 midnight, to submit their application on the eHealth Summer University website. www.universite-esante.com/en

2/ To present their solution in 5-10' in a showroom

The event is free of charge and is a great opportunity for companies and projects leaders to highlight their innovation.

Cooperation Requested

- 1. Technical co-operation**
- 2. Other**

Offer

Support in digital and ehealth collaborative projects and partnerships

Castres-Mazamet Technopole develop its expertise in partnership for collaborative projects. The Technopole has good knowledge of innovation collaborative project and support companies to submit European or national collaborative projects.

The Technopole is used to establish collaborations and partnerships between different regions of the world (Catalonia, Norway ...) and France.

The Technopole can deliver expertise to identify skillness, specially in digital and e-health sectors, and initiate partnership and collaboration (research, market,).

Castres-Mazamet Technopole organizes the eHealth Summer University, an international event only focused on eHealth and that will take place on 1-3 July 2015 in Castres (South West France, close to Toulouse).

During the event, Castres-Mazamet Technopole offers the opportunity for foreign companies to meet ehealth key players and to discuss European ehealth projects with searchers and companies.
