Description

Kizeo is a start-up that develops innovative BtoB IT-solutions. The applications are perfectly suitable for mobile devices under Android, iOS and Windows OS. While developing efficient apps, we attached great importance to a user-friendly performance, a flexible design and presentation, and a constant improvement of the software. These three cornerstones enable us to match with our customers' requirements. Kizeo is represented in 25 countries and communicates in English, French, German, Spanish and Italian. We provide a useful working tool to digitalize paper templates. A better reaction time coupled with an increase in productivity represent Kizeo's main benefit to its customers.
