CASTRES / FRANCE

SUMMER UNIVERSITY

HEALTHCARE THROUGH DIGITAL INNOVATION

Each year over 600 key players and decision-makers from the health-care/social and technological innovation sectors get together in Castres (South West France) for the **eHealth Summer University** to discuss the state of the art in the use of digital technologies and applications in the field of health and well-being.

City /hospital medical follow-up, pain management, care of stroke, vaccination follow-up, rehabilitation, home medical care, cancer care, diabetes, ... mobile applications, surgical robots, web platforms for professional cooperation, serious games ... health and digital technology transform patients care and management. For 9 years, the eHealth Summer University is the place where is drawn the health of tomorrow. On this occasion eHealth Awards are organized, a recognized distinction which highlights the most innovative and meaningful projects, and allow to discover what the future of the medicine, prevention and well-being holds, in short what the future of e-health holds.

The quality of speakers and the “campus” spirit appeal to a steadily growing, informed and faithful audience who comes back over the year and increases its openness to the world.
